Why is TechR2 Certified?

- Immediate access to data: Only Technicians for ISO 27001 or SOC compliant companies are permitted to immediately access critical data within a data-bearing device
- Compliance auditors first assess data security – procedures and training. TechR2 is respected in the ITAD industry
- Large OEM's and government Agencies require the highest level of scrutiny when processing data
- Certified IBM and Dell Service Provider

TechR2 Secure Transport Solution

- TechR2 has been decommissioning datacenters for over twenty years. We utilize a secure transport system with company-owned vehicles and via 3rd party services with full presence and oversight by trained TechR2 technicians
- TechR2 Secure Transport solution is optimum for assuring that vulnerable equipment and data reaches its destination securely and in full compliance
